QS331 CONE CRUSHER PIONEERING SOLUTIONS FOR YOU

TECHNICAL SPECIFICATION

SANDVIK

The QS331 is a compact, self contained mobile cone crusher with an on board diesel engine. Featuring the CS430 Sandvik cone crusher the QS331 is capable of accepting large feed sizes and achieving high production capacities.

The advanced CS430 cone is equipped with a hydroset CSS regulation system that provides overload protection, optimises production and keeps track of liner wear. The unit is also fitted with an automatic level sensor above the crushing chamber to control the feed rate and minimise operator intervention for maximum production and reduction.

KEY BENEFITS

- The chassis is constructed from heavy duty 'l' beam to ensure maximum durability
- Heavy duty, hydraulically positioned feed conveyor
- Up and over metal detector to provide ultimate cone protection from tramp metal
- Automated variable speed feed conveyor via a level sensor to ensure maximum production and reduction of the material
- Direct drive through a PT Tech wet clutch with eight

SPC drive belts to ensure maximum fuel efficiency and power delivery

- Hydraulically driven, variable speed cooling fan for maximum efficiency and auto reverse facility to back flush dust from the radiator
- The machine is designed for ease of mobility, for rapid set up time and transportation
- The CS430 cone has choice of three concaves and four bush settings from a single bush ranging from 16 mm to 30 mm
- The concave and bush settings give unrivalled flexibility regarding CSS ranges, production and material gradation
- Maximum feed size up to 360 mm and capable of up to 344 tph on the larger bush setting
- Can operate in the most hostile environments with a 50°C ambient capability with a lubrication oil change
- Superb access around the crusher for easy maintenance, especially during liner changes
- Remote camera viewing the crushing chamber enables the operator to set up and ensure a choke feed on the crusher from ground level
- Hydraulic driven hydraulic and lubrication coolers to deal with the most arduous conditions.

OPTIONS

Medium coarse and extra coarse chamber kit

Wear resistant hopper liner plates back and sides

Hydraulic folding hopper extensions for rear loading

Central autolube (all bearings) Arctic package -20° C (-4° E) (32 grade byd)

Arctic package -20°C (-4°F) (32 grade hydraulic oil, engine oil and 100 grade lubrication oil)

Arctic package -30°C (-22°F) (Arctic hydraulic oil, engine oil, 100 grade lubrication oil and webasto coolant heater

Tropical package (220 grade lubrication oil for +30°C ambient)

Main conveyor level sensor (stockpile monitor)

Lighting mast and cabinet lights

Remote diesel pump (electric)

 $\ensuremath{\mathsf{Pull}}$ stop cords on the main conveyor

Water pump (hydraulic) Overband magnet Engine filter kit 250 - hours (for 3A engines only) Plant and engine filter kit - 500 hours Intelligent line multi-Machine Communication Head drum guard on the main conveyor only Main conveyor underguards, head drum guard and additional side and rear guards (blue chip guarding) Tool box and contents Radio remote control 1.75 m extended main conveyor
